## ZEC: flessibilità per scelta

ZEC S.p.A. , fondata nel 1961 da Eugenio Zantelli a Colorno, in provincia di Parma, produce tubi termoplastici per applicazioni a bassa, media, alta e altissima pressione.

A partire dal 1990 le attività commerciali sul mercato domestico sono estese all'espansione sui mercati internazionali.

Investimenti in risorse umane particolarmente qualificate, impianti di produzione tecnologicamente avanzati, attività di ricerca e sviluppo e la presenza commerciale favoriscono l'espansione sui mercati globali, dove ZEC S.p.A. oggi è presente in più di 90 paesi.

La considerevole crescita in tutte le aree è stata accompagnata da una gamma di prodotti sempre più ampia, dedicata a numerosi settori applicativi quali oleodinamica, pneumatica, lubrificazione, automotive, alimentare, navale, refrigerazione, petrochimico-offshore, etc. .

La gamma di prodotti di ZEC S.p.A. comprende tubi termoplastici standard o customizzati singoli, multipli e spiralati, con caratteristiche tecniche da 2mm a 40mm di diametro interno, pressioni da lavoro da 5bar a 1280bar e temperature di esercizio da -200°C a +260°C.

Tutti i tubi termoplastici di ZEC S.p.A. sono prodotti con materie prime di primaria qualità accuratamente selezionate. Ogni fase del ciclo produttivo è soggetta a severi controlli qualitativi.

La produzione avviene esclusivamente all'interno dei ns. stabilimenti a Colorno, Italia.

I prodotti finiti sono conformi alle principali normative internazionali dei rispettivi settori applicativi, quali SAE, EN, ISO e DIN.

ZEC S.p.A. opera in regime di qualità UNI EN ISO 9001-2015.

## ZEC: Flexibility for Choice

*ZEC S.p.A. , founded in 1961 by Mr. Eugenio Zantelli in Colorno, Province of Parma, Italy, manufactures thermoplastic tubing and hoses for low, medium, high and very high pressure applications. Domestic business activities are boosted by an International breakthrough as of 1990.*

*Investments in special skilled human resources, manufacturing, product innovations and commercial presence elevates ZEC S.p.A. meanwhile into the global market, covering more than 90 countries world-wide.*

*Significant growth in all areas have been accompanied with an ever increasing product range dedicated to a large portfolio of applications such as fluid power, pneumatics, lubrication, automotive, food processing, marine, refrigeration, petrochemical-offshore, and so on.*

*The ZEC S.p.A. product range includes standard or customized single, multiple and coiled thermoplastic tubing and hoses, with technical characteristics within the range of 2mm to 40mm inner diameter, working pressures from 5bar to 1280bar and operating temperatures from -200°C to +260°C.*

*All products manufactured by ZEC S.p.A. are of top quality and carefully selected raw materials. Manufacturing processes are continuously multiple controlled.*

*The entire production takes place in our facilities located in Colorno, Italy.*

*End products comply strictly with major international standards such as SAE, EN, DIN & ISO.*

*All company sectors and activities are qualified and operate according to UNI EN ISO 9001-2015 quality system.*

## Come scegliere i raccordi

Per connettere i vari componenti di un impianto oleodinamico è necessario avere a disposizione tubi e raccordi adeguati.

Conoscere l'applicazione dell'impianto a cui dobbiamo abbinare tubi e raccordi è indispensabile per fare la scelta più idonea. Bisogna considerare i seguenti fattori:

- pressione di lavoro
- portata
- temperatura d'esercizio
- fluidi e gas interessati
- presenza di vibrazioni
- condizioni ambientali e rischio corrosione

La corretta esecuzione dell'assemblaggio tubo/raccordo è fondamentale per garantire le caratteristiche di resistenza alla pressione ed alla fatica. Per avere garanzia di una corretta esecuzione dell'assemblato è fondamentale attenersi alle raccomandazioni e alle istruzioni fornite da ZEC. Tale sistema è garantito da ZEC grazie a severe prove a banco eseguite presso il nostro laboratorio. ZEC non garantisce tubi assemblati che non siano eseguiti secondo le proprie specifiche.

Le connessioni per tubo flessibile sono di una grande varietà. Ogni tipologia ha le proprie caratteristiche distintive ed è diffusa in paesi diversi. Di seguito sono elencate le principali tipologie.

## How to choose the correct fitting

*For the connection of the single components of a fluid power system, suitable hoses and fittings are required.*

*For a correct choice of hoses and fittings it's essential to know the application of the system, considering the following factors:*

- *working pressure*
- *flow rate*
- *working temperature*
- *used fluids and gases*
- *presence of vibrations*
- *environmental conditions and risk of corrosion*

*The correct assembly of hose and fitting is of vital importance for guaranteeing resistance against pressure and mechanical stress. In order to obtain a correct assembly, ZEC recommendations and instructions must be observed and followed. Such system is guaranteed by ZEC thanks to severe tests, performed in our laboratory on our test benches. ZEC doesn't accept any liability for hose assemblies, which have been produced without respecting the correct specifications.*

*There is a huge variety of flexible hose connections. Each type has its own distinguishing features and is common in different countries. Below you will find a list of the main types.*

## BSPP (British Standard Pipe Parallel)

Questo tipo di accoppiamento prevede filettatura ISO 228 cilindrica sul maschio e sulla femmina, la tenuta è garantita da un tronco di cono per le femmine girevoli ed una sede conica per i maschi. Entrambe le conicità sono di 60°. In alcune applicazioni è previsto l'O-Ring sul tronco di cono del raccordo femmina.

## BSPP (British Standard Pipe Parallel)

*This type of connection has a parallel thread according to ISO 228 both on male and on female fitting. The sealing is assured by swivel female 60° cone and male 60° conical seat. In some applications there is an O-Ring on the female cone.*

## BSPT (British Standard Pipe Tapered)

I maschi BSPT hanno la filettatura ISO 7 conica e si accoppiano con femmine BSPT oppure femmine BSPP. La tenuta avviene per deformazione della filettatura, è raccomandato l'utilizzo di sigillante.

## BSPT (British Standard Pipe Tapered)

*BSPT male fittings have a tapered thread according to ISO 7 and combine with both BSPT and BSPP female fittings. Sealing is assured by deformation of the thread. The use of sealant is recommended.*

## NPT / NPTF / NPSM

La tenuta dei raccordi NPT (National Pipe Thread) avviene per deformazione del filetto conico, è raccomandato l'uso di sigillante. La filettatura NPTF (National Pipe Tapered Fuel) è sempre conica ma la tenuta è a secco. Le femmine girevoli NPSM (National Pipe Straight Mechanical) hanno filettatura cilindrica e la tenuta è data dal tronco di cono 60° che si accoppia con la conicità posta sul maschio NPT oppure NPTF.

## NPT / NPTF / NPSM

*Sealing of NPT (National Pipe Thread) male fittings is assured by deformation of the tapered thread, the use of sealant is recommended. NPTF (National Pipe Tapered Fuel) male thread is tapered as well, but dry-sealing. Swivel females NPSM (National Pipe Straight Mechanical) have a parallel thread and sealing is assured by 60° cone, which combines with NPT or NPTF male conical seat.*

## SAE J514 37° JIC

I raccordi con tenuta tramite conicità 37° sono costruiti secondo la SAE J514 e sono conosciuti come Raccordi JIC. La tenuta è garantita dal tronco di cono presente nel maschio e dalla conicità sulla femmina, i filetti sono cilindrici del tipo UNF.

## SAE J514 37° JIC

*JIC fittings are designed according to SAE J514. Sealing is assured by 37° cone on male fitting and 37° conical seat on female fitting. Both have an UNF parallel thread.*

## SAE J1453 ORFS (O-Ring Face Seal)

Questa tipologia di raccordi ha la caratteristica di avere il maschio con l'O-Ring applicato frontalmente e la femmina con la testa piana, il contatto di entrambi garantisce la tenuta. La filettatura è cilindrica del tipo UN-UNF.

## SAE J1453 ORFS (O-Ring Face Seal)

*This type of fittings is characterised by the O-Ring applied on the front end of the male and the flat head of the female fitting. Sealing is assured by contact of both. Thread is parallel of UN-UNF type.*

## SAE J1926 ORB (O-Ring Boss)

Il raccordo maschio O-Ring Boss ha il filetto cilindrico del tipo UNF. La tenuta avviene tramite una guarnizione O-Ring posta tra la chiave esagonale ed il filetto.

## SAE J1926 ORB (O-Ring Boss)

*O-Ring Boss male fittings have a UNF type parallel thread. Sealing is assured by the O-Ring placed between hexagon and thread.*

## Metrico 60° DKM

La tenuta è garantita dal tronco di cono presente nel maschio e dalla conicità sulla femmina e sono entrambi di 60°, la filettatura è cilindrica metrica.

## Metric 60° DKM

These fittings have a parallel metric thread. Sealing is assured by 60° male fitting cone and 60° female fitting conical seat.

## Occhi

I raccordi ad occhio permettono di effettuare un gomito a 90° molto compatto ed orientabile in assenza di pressione. Sono sempre abbinati ad un bullone forato o vite cava che può avere una filettatura BSPP o Metrica. La tenuta avviene tramite rondelle in rame o bonded seal posizionate sulla facce parallele dell'occhio.

## Banjo

By means of Banjo fittings a very compact 90° elbow, which in absence of pressure is orientable, can be obtained. They are always combined with a bored bolt or hollow screw, which might have a BSPP or metric thread. Sealing is assured by copper washers or bonded seals, placed on the parallel faces of the banjo.

## DIN 24°

Le femmine sono chiamate DKOL-DKOS (DIN 3865) ed hanno il tronco di cono 24° con integrata la guarnizione O-Ring, i maschi CEL o CES (DIN 3861) si accoppiano con le femmine 24° con O-Ring oppure senza (DIN 3868), inoltre si assemblano con i codoli lisci con l'ausilio dell'anello tagliante (DIN 2353 e DIN 3861). La filettatura è cilindrica metrica.

## DIN 24°

The female fittings, called DKOL/DKOS (DIN 3865), are provided with a 24° cone with integrated O-Ring.

The male fittings CEL/CES (DIN 3861) combine with the 24° females with/without O-Ring (DIN 3868). Further they can be assembled with metric standpipes BEL/BES by means of a cutting ring (DIN 2353 and DIN 3861). They have a parallel metric thread.

## Unità di misura della pressione / Pressure measurement unit

Unità	Simbolo	Corrisponde a
MegaPascal	MPa	1 bar = 0,1 MPa
KiloPascal	kPa	1 bar = 100 kPa
Pound per square inch	psi	1 bar = 14,5 psi

## Trattamenti superficiali / Surface Treatments

I raccordi ZEC S.p.A. realizzati con acciaio al carbonio AVP subiscono un trattamento superficiale di zincatura trivalente con sigillante, su richiesta sono fornibili anche con Zinco Nichel.

*ZEC fittings made of carbon steel are subjected to a trivalent zinc plating surface treatment with sealant. On request they are available also with Zinc-Nickel coating.*

## Acciaio INOX / Stainless Steel

L'acciaio INOX utilizzato per costruire i raccordi ZEC S.p.A. è l'AISI 316L, su richiesta sono fornibili anche in AISI 316 Ti.

*ZEC stainless steel fittings are made of AISI 316L, AISI 316 Ti available on request.*

## Guarnizioni O-Ring / O-Ring Seals

Dove previsto i raccordi ZEC S.p.A. sono solitamente corredati con O-Ring in NBR, su richiesta sono fornibili anche in altri materiali.

*Where applicable ZEC S.p.A. fittings are usually equipped with O-Ring made of NBR. On request they can also be provided with O-Ring made of different materials.*

## Una vasta gamma di raccordi / *A wide range of fittings*

Questo catalogo contiene una selezione dei raccordi Zec. L'ufficio Ricerca e Sviluppo progetta infatti direttamente la maggior parte dei raccordi a catalogo e la totalità delle boccole proposte per avere un maggiore controllo sulla conformità alle normative internazionali e la compatibilità con i propri tubi.

*This catalogue contains a selection of Zec fittings. Our Research and Development department directly designs most of the fittings in the catalogue and the totality of the proposed ferrules to have perfect control over compliance to international standards and compatibility with its own hoses.*

Tutti i raccordi CNG sono disponibili anche in acciaio Inox AISI 316L.  
*All the CNG fittings are available also in stainless steel AISI 316L.*

### IMPORTANTE

- Per evitare l'invecchiamento precoce delle guarnizioni, tutti i raccordi CNG sono forniti privi di o-ring sulla connessione. Contattare ZEC per le specifiche sugli o-ring.

### IMPORTANT

- In order to avoid premature ageing of the seals, all CNG fittings are supplied without o-rings already installed on the connections. Contact ZEC for the o-rings specifications.

L'utilizzo delle boccole recuperabili non permette al tubo di raggiungere le prestazioni dichiarate in scheda tecnica (pressione di esercizio, di scoppio e tenuta agli impulsi come da norma SAE J517).

Pertanto, la massima pressione di esercizio sarà ridotta al 90% di quella dichiarata e la temperatura di esercizio non dovrà essere superiore agli 80°C. Si sconsigliano inoltre i raccordi recuperabili in presenza di elevati impulsi di pressione.

*The use of reusable ferrules reduces the hose performances according to data sheet (burst and working pressure and impulse resistance in compliance with SAE J517 Standard). Therefore, the maximum working pressure has to be reduced to 90% of the declared one and the working temperature must not exceed 80°C. Moreover, reusable fittings are not suitable for applications with high pressure impulses.*

ZEC fornisce su richiesta raccordi del tipo Microtubi e Miniprese anche in Acciaio Inox AISI 316L.  
*Micro Hoses type fittings and Test Couplings are available, on request, also in AISI 316L Stainless Steel.*

## INDICAZIONI DI INSTALLAZIONE DELLA TUBAZIONE HOSE ASSEMBLY INSTALLATION INSTRUCTIONS (SAE J1273 - ISO 8331)

## ISTRUZIONI E DATI DI RACCORDATURA CRIMPING DATA AND INSTRUCTIONS

Per una corretta e sicura operazione di raccordatura raccomandiamo l'uso di raccordi e boccole ZEC. Istruzioni e diametri di pressatura sono disponibili e sempre aggiornati nell'Area Riservata del sito ZEC: [www.zecspa.com/it/area-riservata](http://www.zecspa.com/it/area-riservata)

For a correct and safe crimping operation, we recommend the use of ZEC ferrules and fittings. Proper instructions and crimping diameters are available and always updated in Reserved Area of our website: [www.zecspa.com/en/reserved-area](http://www.zecspa.com/en/reserved-area)

Le immagini e i valori menzionati in questo documento sono forniti a titolo puramente indicativo al fine di consentire una prima valutazione sulle possibilità di impiego dei prodotti. La Nostra produzione potrà essere variata senza impegno di alcun preavviso alla Nostra clientela.

Si raccomanda di verificare sul sito [www.zecspa.com](http://www.zecspa.com) la presenza di possibili adeguamenti per scaricare le schede tecniche di prodotto aggiornate.

**È responsabilità del cliente verificare che i tubi e i raccordi siano adatti alla propria applicazione e soddisfino le specifiche e gli standard richiesti.**

Per condizioni di vendita: [www.zecspa.com/it/condizioni-general-di-vendita](http://www.zecspa.com/it/condizioni-general-di-vendita).

The images and values indicated in the present document are to be intended only as an indication, with the purpose of permitting the customer a first evaluation of the products application possibilities. Our production can be modified without any obligation of prior notice to our customers.

Therefore we recommend to consult our website [www.zecspa.com](http://www.zecspa.com) for the latest version of the technical data sheets.

**It's the Customer's responsibility to check that hoses and fittings are suitable for his application and meet the required specifications and standards.**
